RE: REQUEST FOR PHASE I WIRELESS E9-1-1 SERVICE

Dear Mr. Roach:

On behalf of the Commission on State Emergency Communications (CSEC), please know that we appreciate your company's participation in our efforts to implement Phase I Wireless E9-1-1 service in accordance with FCC rules. Through the process of responding to the Wireless Service Provider Survey, attending planning meetings, and participating in follow-up conference calls, the CSEC and the Wireless Service Provider community have made great strides toward providing enhanced 9-1-1 service to wireless callers in Texas. Much has been accomplished, however, there is much more work to be done.

As authorized in Texas Health and Safety Code, Chapter 771.051, the CSEC is the state's authority on emergency communications, and is responsible for the oversight and implementation of 9-1-1 service throughout the state's 9-1-1 program area. The state program is implemented through a partnership with the state's twenty-four Regional Planning Councils (RPCs). As described in Health and Safety Code, Chapter 771, the CSEC is the oversight and funding agency for the 9-1-1 programs administered by the RPCs. Acting in this capacity, the CSEC is directly placing the orders for Phase I Wireless E9-1-1 service on behalf of all of the RPCs of Texas. This letter serves as the CSEC's formal request for your company to that service. We request that you provide written acknowledgement of this request upon your receipt of this letter as a matter of public record.

The CSEC requests that Phase I Wireless E9-1-1 service be fully implemented in the following Regional Planning Councils (RPCs), or Councils of Governments (COGs), and related counties no later than June 15, 2000.

- Central Texas Council of Governments Hamilton County
 Mills County
- Heart of Texas Council of Governments Bosque County
 Hill County
- North Central Texas Council of Governments Erath County
 Somervell County
- West Central Texas Council of Governments Brown County
 Coleman County
 Comanche County
 Eastland County
 Runnels County

We request that you complete the standard Phase I E9-1-1 Service Agreement, provided to you by the CSEC, for each individual COG indicated above. The agreement should be complete, with a detailed cost model attached for our review. The completed contract, in duplicate originals, should be sent to CSEC offices no later than January 28, 2000. The CSEC will coordinate the execution of the contracts with each individual COG, and will subsequently return one of the fully executed originals to your company. We request that you do not contact the COGs until the contracts are fully executed. We will notify both parties, COGs and Wireless Service Providers, when the contracts are executed and implementation can begin. Upon notification, the Wireless Service Provider will be requested to work directly with the COGs in implementing service.

It is important that each carrier provide the CSEC with a cost model that includes costs by specific components such as trunking, database, SCP functionality, and other related costs. It is incumbent upon the CSEC to review all costs to ensure that we procure services that provide the best value, and avoid cost and service duplication. As you are aware, the CSEC has procured the services of SCC Communications to provide SCP services and wireless database services to the state program at a negotiated contract price. Wireless Service Providers are under no obligation to utilize all of these services. However, since some of these services, specifically the SCP function, may be provided to the Wireless Service Provider by other sources, the CSEC has the responsibility to closely examine all costs to avoid any possible cost duplication and to ensure that the State program receives the best possible comparative value. A complete and detailed cost model is essential in making this determination.

The CSEC wishes to assist the Wireless Service Providers in facilitating the successful implementation of wireless E9-1-1 service as much as possible. In order that we may better assist you in this matter, please provide the CSEC with a written list of any needed information with your contract submission. The CSEC will make every effort to expedite these requests to provide the information to you as soon as possible.

In summary, the CSEC requests that you respond to this request through the following correspondence:

- Written acknowledgement of this Phase I request letter, upon receipt
- Phase I E9-1-1 Service Agreement, complete and submitted in duplicate originals, no later than January 28, 2000
- Detailed Cost Model, in conjunction with contract submission, no later than January 28, 2000
- Written request for additional information, in conjunction with contract submission, no later than January 28, 2000

Again, we appreciate your efforts in the implementation of wireless 9-1-1 service in Texas. If you have questions or need further information regarding this request, please feel free to contact me at 512/305-6938, or email at kelli.merriweather@csec.state.tx.us.

Sincerely,

Kelli Merriweather

RE: REQUEST FOR PHASE I WIRELESS E9-1-1 SERVICE

Dear Ms. Smith:

On behalf of the Commission on State Emergency Communications (CSEC), please know that we appreciate your company's participation in our efforts to implement Phase I Wireless E9-1-1 service in accordance with FCC rules. Through the process of responding to the Wireless Service Provider Survey, attending the planning meetings in Austin, and participating in the follow-up conference calls, the CSEC and the Wireless Service Provider community have made great strides toward providing enhanced 9-1-1 service to wireless callers in Texas. Much has been accomplished, however, there is much more work to be done.

As authorized in Texas Health and Safety Code, Chapter 771.051, the CSEC is the state's authority on emergency communications, and is responsible for the oversight and implementation of 9-1-1 service throughout the state's 9-1-1 program area. The state program is implemented through a partnership with the state's twenty-four Regional Planning Councils (RPCs). As described in Health and Safety Code, Chapter 771, the CSEC is the oversight and funding agency for the 9-1-1 programs administered by the RPCs. Acting in this capacity, the CSEC is directly placing the orders for Phase I Wireless E9-1-1 service on behalf of all of the RPCs of Texas. This letter serves as the CSEC's formal request for your company to that service. We request that you provide written acknowledgement of this request upon your receipt of this letter as a matter of public record.

The CSEC requests that Phase I Wireless E9-1-1 service be fully implemented in the following Regional Planning Councils (RPCs), or Councils of Governments (COGs), and related counties no later than April 15, 1999.

- Ark-Tex Council of Governments

Bowie County
Cass County
Red River County

Prior to service implementation, we request that you complete the standard Phase I E9-1-1 Service Agreement, provided to you by the CSEC, for each individual COG indicated above. The agreement should be complete, with a detailed cost model attached for our review. The completed contract, in duplicate originals, should be sent to CSEC offices no later than November 1, 1999. The CSEC will coordinate the execution of the contracts with each individual COG, and will subsequently return one of the fully executed originals to your company. We request that you do not contact the COGs until the contracts are fully executed. We will notify both parties, COGs and Wireless Service Providers, when the contracts are executed and implementation can begin. Upon notification, the Wireless Service Provider will be requested to work directly with the COGs in implementing service.

It is important that each carrier provide the CSEC with a cost model that includes costs by specific components such as trunking, database, SCP functionality, and other related costs. It is incumbent upon the CSEC to review all costs to ensure that we procure services that provide the best value, and avoid cost and service duplication. As you are aware, the CSEC has procured the services of SCC Communications to provide SCP services and wireless database services to the state program at a negotiated contract price. Acting in this capacity, the CSEC is directly placing the orders for Phase I Wireless E9-1-1 service on behalf of all of the RPCs of Texas. This letter serves as the CSEC's formal request for your company to that service. We request that you provide written acknowledgement of this request upon your receipt of this letter as a matter of public record.

The CSEC requests that Phase I Wireless E9-1-1 service be fully implemented in the following Regional Planning Councils (RPCs), or Councils of Governments (COGs), and related counties no later than June 15, 2000.

- ARK-TEX Council of Governments

Lamar County

We request that you complete the standard Phase I E9-1-1 Service Agreement, provided to you by the CSEC, for each individual COG indicated above. The agreement should be complete, with a detailed cost model attached for our review. The completed contract, in duplicate originals, should be sent to CSEC offices no later than January 28, 2000. The CSEC will coordinate the execution of the contracts with each individual COG, and will subsequently return one of the fully executed originals to your company. We request that you do not contact the COGs until the contracts are fully executed. We will notify both parties, COGs and Wireless Service Providers, when the contracts are executed and implementation can begin. Upon notification, the Wireless Service Provider will be requested to work directly with the COGs in implementing service.

It is important that each carrier provide the CSEC with a cost model that includes costs by specific components such as trunking, database, SCP functionality, and other related costs. It is incumbent upon the CSEC to review all costs to ensure that we procure services that provide the best value, and avoid cost and service duplication. As you are aware, the CSEC has procured the services of SCC Communications to provide SCP services and wireless database services to the state program at a negotiated contract price. Wireless Service Providers are under no obligation to utilize all of these services. However, since some of these services, specifically the SCP function, may be provided to the Wireless Service Provider by other sources, the CSEC has the responsibility to closely examine all costs to avoid any possible cost duplication and to ensure that the State program receives the best possible comparative value. A complete and detailed cost model is essential in making this determination.

The CSEC wishes to assist the Wireless Service Providers in facilitating the successful implementation of wireless E9-1-1 service as much as possible. Enclosed you will find an Individual Carrier Report and coverage map to provide you with more detailed information regarding the current E9-1-1 Network. In order that we may better assist you in this matter, please provide the CSEC with a written list of any needed information with your contract submission. The CSEC will make every effort to expedite these requests to provide the information to you as soon as possible.

In summary, the CSEC requests that you respond to this request through the following correspondence:

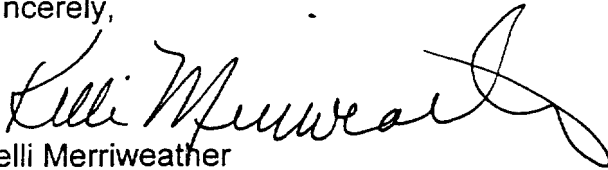

- Written acknowledgement of this Phase I request letter, upon receipt
- Phase I E9-1-1 Service Agreement, complete and submitted in duplicate originals, no later than January 28, 2000
- Detailed Cost Model, in conjunction with contract submission, no later than January 28, 2000
- Written request for additional information, in conjunction with contract submission, no later than January 28, 2000
